1. Aircraft instruments, copied from types made in western countries, are being manufactured at the Prague Holesovice (051/L 78) plant (formerly the Hodek Company) of the PAL Works (Spojene zavody automobiloveho a leteckeho prumyslu). The plant, which has been classed as one vital to the national defense, employs about 200 workmen, and sends the bulk of its output to the Soviet Union.
2. Instruments produced here, together with monthly production figures, are:
 

<u>Instrument</u>	<u>Monthly Rate</u>
a. Aircraft hand compasses	900
b. Aircraft screw compasses, auxiliary compasses and sun compasses	"
c. Aircraft fuel gauges	"
d. Aircraft tachometers	200
e. Aircraft magnetic revolution counters	80
f. Special type magnetic revolution counters which have a life of about 1,000 flying hours	50 - 60
g. Signaling devices for landing gears	200
3. The plant is equipped with a modern refrigerator chamber, with a temperature range from minus 60 to plus 40 degrees centigrade, in which instruments are tested by specialists from the Ministry of National Defense (MNO).

4. Fine bronze wire, imported from Switzerland, is the most important component of these precision instruments. A decreased inflow of this wire and other parts coming from the western countries would bring production to a standstill, source asserts. If deliveries continue at their present rate, however, the plant management intends to add an extra shift to help speed up production.
